Research	Database Systems; Systems for AI and ML; Interactive Data Analytics; Computational Notebooks; Vector Search & Databases	
Education	Ph.D., Computer Science University of Illinois Urbana Champaign • Dissertation Proposal: Data Infrastructure for Emerging AI and Data Science Applications • Advisor: Yongjoo Park	Aug 2021 - May 2026
	B.S., Statistics and Computer Science University of Illinois Urbana Champaign • <i>Magna Cum Laude and with Highest Distinction in Statistics and Computer Science</i> • <i>High Distinction in Mathematics</i> • Thesis: REFORM: Fast and Adaptive Solution for Subteam Replacement • Advisor: Hanghang Tong	Aug 2017 - May 2021
Professional Experience	Senior Research Scientist ByteDance System Infrastructure Lab	July 2026 - Present
	Research Assistant University of Illinois Urbana Champaign CreateLab	Aug 2021 - May 2026
	Research Intern ByteDance System Infrastructure Lab	May 2025 - Aug 2025
	Research Intern ByteDance System Infrastructure Lab	May 2024 - Oct 2024
	Software Engineer Intern Google LLC Google Cloud, Google BigQuery	May 2023 - Aug 2023
	Software Engineer Intern Google LLC Google Cloud, Systems & Storage Infrastructure	May 2022 - Aug 2022
	Research Assistant University of Illinois Urbana Champaign IDEA Lab	Aug 2020 - May 2021
	Software Engineer Intern Google LLC	May 2020 - Aug 2020

Google Ads, Google Local Services

Software Engineer Intern
Google Canada Corporation
Google Ads, Google Ads Experiments

May 2019 - Aug 2019

Awards	Best Demo Award , SIGMOD 2025 <i>With Supawit Chockchowwat, Hanxi Fang, and Yongjoo Park</i>	June 2025
	Travel Grant , PyCon 2025	March 2025
	Travel Award , ICDE 2023	March 2023
	Finalist , C1Games Terminal Game AI competition	September 2019
	Best Data Visualization Award , Illini Datathon	February 2019

Software Releases

Kishu: Versioned and Undoable Notebook System

Kishu is the first notebook system that supports versioning of notebook session states: it allows users to both undo cell executions and manage branching states containing objects such as machine learning models, plots, and dataframes through a Git-like commit and checkout interface. Kishu is integrated into JupyterLab, and has been presented at **PyCon 2025** and **JupyterCon 2025**. Kishu received funding and adoption at UIUC's **National Centre of Supercomputing Applications (NCSA)**, and also contributed to NSF grant **CAREER: Kishu: Checkpointing Data Science with Nonintrusive State Manager** (NSF #2440498, \$600,000). <https://github.com/illinoisdata/kishu>

SIEVE: Effective Filtered Vector Search with Collection of Indexes

SIEVE is an indexing framework for filtered vector search. It builds an (incrementally updatable) workload-aware collection of graph indexes to effectively serve filtered vector queries with arbitrary selectivities and filter/predicate formats. SIEVE has been studied by [Alibaba AntGroup](#). <https://github.com/BillyZhaohengLi/SIEVE-vldb25>

Teaching	ML and Data Systems (CS 598) Teaching Assistant, University of Illinois at Urbana-Champaign	Spring 2024
	Game Development (CS 498) Teaching Assistant, University of Illinois at Urbana-Champaign	Spring 2022
	Introduction to Computer Science (CS 125) Course Assistant, University of Illinois at Urbana-Champaign	Spring 2018
Invited Talks	ICDE 2026 , Montreal, Canada <i>MojoFrame: Dataframe Library in Mojo Language</i>	May 2026
	Midwest Data Day 2026 , Chicago, USA <i>Kishu: Time-Traveling for Computational Notebooks</i>	April 2026
	Purdue University , West Lafayette, USA <i>Data Infrastructure for AI and Data Science Applications</i>	April 2026
	UC Irvine , Irvine, USA <i>Data Infrastructure for AI and Data Science Applications</i>	March 2026
	JupyterCon 2025 , San Diego, USA World's first Undoable Notebook	November 2025
	VLDB 2025 , London, United Kingdom <i>Kishu: Time-Traveling for Computational Notebooks</i>	September 2025
	PyCon 2025 , Pittsburgh, USA World's first Undoable Notebook	May 2025
	UIUC NCSA , Urbana, USA <i>State Replication and Time-Traveling for Computational Notebooks</i>	April 2025
	VLDB 2024 , Guangzhou, China <i>ElasticNotebook: Enabling Live Migration for Computational Notebooks</i>	August 2024
	Bytedance Inc. , San Jose, USA <i>State Replication and Time-Traveling for Computational Notebooks</i>	August 2024
	ICDE 2023 , Anaheim, USA <i>S/C: Speeding up Data Materialization with Bounded Memory</i>	April 2023
